

## Airworthiness Engineer (f/m/x)

Location: London, Ontario, CAN

AT DIAMOND AIRCRAFT, WE COMBINE ATTENTION TO DETAIL WITH CUTTING-EDGE TECHNOLOGY AND PIONEERING INNOVATION. OUR DEDICATION TO THE QUALITY OF OUR ENGINEERING AND WORKMANSHIP MAKES OUR AIRCRAFT THE SAFEST IN THEIR CLASS.

### Job Summary:

The principal responsibilities of the Airworthiness Engineer are to manage and coordinate all activities relating to the type design approvals for Diamond products. This includes new development programs, continuing airworthiness activities and production support. This position is the primary contact with Transport Canada Civil Aviation (TCCA) and all other foreign authorities.

### Responsibilities

- ◆ Assist in the preparation of airworthiness compliance reports and certification plans.
- ◆ Review design and certification methods to ensure that the products will be certified in an efficient and complete manner.
- ◆ Liaise with Engineering, production, and Customer Support to manage projects and issues.
- ◆ Provide design guidance to Specialists relating to methods of compliance.
- ◆ Track and document issues, reports, and actions.
- ◆ Coordinate submission of Compliance Data.
- ◆ Perform and coordinate certification activities for new aircraft types or changes to Type Design (design changes, Airplane Flight Manual, Airworthiness Limitations) with Transport Canada and foreign Airworthiness authorities.
- ◆ Negotiate and gain agreement with authorities related to interpretation of requirements.
- ◆ Liaise with TCCA on Programs, interfacing and focal point for all communication relating to aircraft certification and continuing airworthiness between the company and the Airworthiness authorities.
- ◆ Manage issues, actions, and reports for all activities.
- ◆ Control TCCA LOI.
- ◆ Participate in the engineering change board.
- ◆ Perform all work in accordance with Health and Safety policies.
- ◆ Perform other duties as assigned.

### Skills & Experience:

- ◆ Engineering degree or equivalent.
- ◆ Understanding of basic engineering and design principles.
- ◆ Basic Understanding of aeronautical regulations and guidance material.
- ◆ Familiar with aerospace products and processes.
- ◆ Proficient in PC use; including Microsoft Office, PowerPoint, Project Applications and AutoCAD.
- ◆ Strives to achieve a high level of quality and productivity.
- ◆ Ability to produce clear and comprehensive written procedures and reports.
- ◆ Proactive thinker and creative.
- ◆ Ability to work under minimal supervision.
