

New factory for Diamond Aircraft in China

On August 28, 2017 Diamond Aircraft opened a new factory in China, together with the first flight of a completely built aircraft in China.

In this new production and development facility, both existing aircraft are being built and new aircraft and engines are being constructed.

“It is unbelievable what the Chinese government is doing to build its economy. This is our fourth and most beautiful location in the world,” said Christian Dries, CEO and owner, Diamond Aircraft Industries GmbH.

About Diamond:

Diamond produces a full range of high quality certified all composite aircraft including the 2 seat DA20, the 4 seat DA40, 4 seat twin engine DA42 and 7 seat twin engine DA62. Diamond uses proprietary lead-free jet fuel piston engines, made by Austro Engine GmbH of Austria, for the DA40, DA42 and DA62. Diamond applies modern technologies to achieve high fuel efficiency, low noise, excellent performance and safety. Our aircraft are flown by private pilots and professional flight training operators and institutions worldwide.

The entire Diamond range is distributed in the USA and Canada by Diamond Aircraft Industries Inc. (Canada).
