

PFA Orders Four Additional DA40NG From Diamond Aircraft Canada

Pilot Flight Academy (PFA) recently announced that they next summer will open a new base at Notodden in Norway, and to support the expansion and the opening of the new base, PFA has today ordered four new DA40 NG from Diamond Canada.

CEO of PFA Frode Granlund says it was an easy choice to select the modern DA40 NG Diamond Aircraft. “We already have an all Diamond DA40 NG and DA42 NG fleet, and are very happy with the operational reliability and the low operational costs of these aircraft”

“Furthermore, we do now also see that the environmental advantages with the low noise level and the use of jet fuel with no lead is highly recognised by the airports and the local communities around airports” Granlund added. “Due to the very low noise level, the DA 40 NG has been exempted from all

noise restrictions at our main base, and we can now practise landing circuits from 6 AM until midnight, and we expect the same for other airports. That enables a much higher utilisation of every aircraft, and that is of course is a huge competitive advantage for us”.

The new DA40NG’s are equipped with efficient, clean and very quiet jet-fuel Austro engines and the new Garmin G1000 NXi glass cockpits. “We are excited about our continued partnership with Pilot Flight Academy in Norway and commend them on their continued strategic growth plan” said Scott McFadzean, COO of Diamond Aircraft Industries Inc. “They continue to exemplify commitment to new technologies and world class flight instruction. We are very proud of our partnership with PFA”.

About Diamond:

Diamond produces a full range of high quality certified all composite aircraft including the 2 seat DA20, the 4 seat DA40, 4 seat twin engine DA42 and 7 seat twin engine DA62. Diamond uses proprietary lead-free jet fuel piston engines, made by Austro Engine GmbH of Austria, for the DA40, DA42 and DA62. Diamond applies modern technologies to achieve high fuel efficiency, low noise, excellent performance and safety. Our aircraft are flown by private pilots and professional flight training operators and institutions worldwide.

The entire Diamond range is distributed in the USA and Canada by Diamond Aircraft Industries Inc. (Canada).
